### Competition

As I watched the JV football game last night, some people asked why we were playing a school that was so much bigger in enrollment than United, a school that has been having some success in football the past few years. I explained that this was good for our players. The hottest fires forge the toughest steel. I want our athletes to win each and every time they step on the playing surface. I also want them to face good, tough competition that pushes them to their max as often as possible. It is the same reason you chose to enroll your sons and daughters at HCP because you wanted a rigorous academic experience for them. You want them tested and proven when they go on to college. Athletics are an extension of the classroom and we need to test our athletes too! As always, GO IRISH!!
